

Is your medical site accessible to youth?

Find out using the
YOUTH EQUITY ASSESSMENT TOOL (YEAT)

What is the YEAT?

- A youth-developed tool to determine if a medical space is inclusive and affirming of all young people
- A secret-shopper format with trained youth conducting the assessment
- Evaluates criteria such as appointment scheduling, clinic exterior, waiting room, staff, etc.

What do medical sites gain?

- Clinic assessed by young people
- Report of findings, including highlights and areas for improvement
- Suggestions on how to improve
- Opportunity to have youth-led training for staff to further understand need for, and ways to make, changes identified

Interested in using the YEAT? Email info@moash.org for more information.
